

CHURCHBEACON APP

One app. One church family. Better connection.

ChurchBeacon brings worship, giving, prayer, events, and member communication together in one simple app built with small churches in mind.

Guests can participate right away—no account required. Approved members unlock the private church directory, prayer list, preferences, and member-only tools.

AVAILABLE TO EVERYONE

Simple ways to worship, give, connect, and participate—even before registering.

Live Worship & Sermons

See when your church is live and join the livestream from the app. Churches can also provide sermon notes so people can follow along during the service or review them later.

Simple, Flexible Giving

Give once or schedule weekly or monthly gifts, choose from the funds your church provides, and give anonymously when desired. Donors may also have the option to help cover transaction costs so more of their gift reaches the church. Payments are processed securely through Stripe, and year-end giving information is available in the app for tax records.

Prayer Requests

Share a need with the church by selecting a category, adding a title, and describing the request. Requests may be submitted anonymously. When a pastor identifies an urgent need, a high-priority notification can quickly invite the church family to pray.

Paperless Visitor Connection Card

Visitors can record their visit without filling out a paper card. Only a name is required; every other detail is optional, allowing guests to share only what feels comfortable.

Events at a Glance

Choose a simple upcoming-events list or a full calendar view. Indicators make busy days easy to spot, while birthdays and anniversaries can be shown or hidden independently in each view.

Guest Access Without Registration

Guests can view sermon notes, complete a visitor card, give online, and use other public church features without creating an account.

More connection for approved members

Private, practical tools that help a church family care for one another and stay informed.

Prayer List & Answered Prayers

View approved prayer requests, filter the list by category, and revisit answered prayers. Members can mark their own request as answered, helping others see how God is working and when a need has been resolved.

Member & Staff Directory

Call, text, or email members and staff with a tap. Each member controls whether their contact information appears, helping the church stay connected while respecting individual privacy.

Your Profile, Your Preferences

Update contact details, take or upload a profile photo, and choose whether to display your photo, birthday, anniversary, children, and contact information. Members decide what they are comfortable sharing.

Member Assignments & Reminders

Churches can create private assignments for needs such as Kids Club snacks, cleaning teams, special music, or counseling appointments. Assigned members can update the description to coordinate details, and the next assignment appears on the home screen as a helpful reminder.

Notifications That Matter

Choose notifications for livestreams, church announcements, and urgent prayer needs—whether it is time to join worship, an important update, or a request to pray right now.

Flexible Sign-In

Create a ChurchBeacon username and password or use supported Google or Apple sign-in options for a faster return to the app.

Belong to More Than One Church

Have a home church but regularly visit another ChurchBeacon church? Join more than one church and switch between them without maintaining separate accounts.

CHURCHBEACON • Technology that helps small churches stay connected and informed.
